

Dear parents,

With schools closed for an extended period of time, I know you'll need tools to keep your kids learning at home. It's a stressful time and it's hard to know which learning tools to use.

So, I wanted to introduce you to a tool that will help alleviate some of that stress: Legends of Learning – a game-based learning tool that your kids already play in my classroom.

Legends of Learning keeps your kids engaged by offering thousands of curriculum-aligned math and science games for elementary and middle school students. Millions of students already play Legends of Learning games nationwide in schools, but during this time they can also play at home with our school's normal curriculum in "Home Mode," which is being offered for FREE during school closures.

Backed by published research out of Vanderbilt University, Legends of Learning is one of the only online educational tools that allows you to actively see your child's learning progression as they play through at their own speed.

The best part? You can check in on their progression throughout the day, but you don't have to stand over their shoulder to make sure they are learning.

Sincerely,

Your Child's Teacher

BIGGEST LIMITATION

Only available on laptops due to higher graphics requirements.

Thousands of curriculum-aligned math and science games for elementary and middle school students along with epic quests and battles. Millions of students play Legends of Learning games in school in Teacher Mode, but they can also play at home on their own to progress through the school's normal curriculum in Home Mode. Backed by published research out of Vanderbilt University, Legends of Learning is one of the only tools that allows you to actively see your child's learning progression.

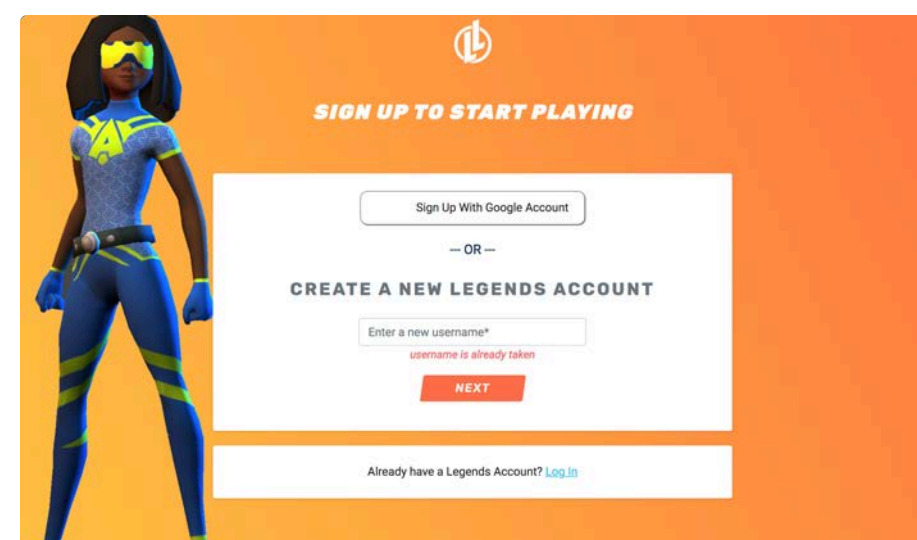

Getting started is super easy!

REMOTE
LEARNING

1

Sign up

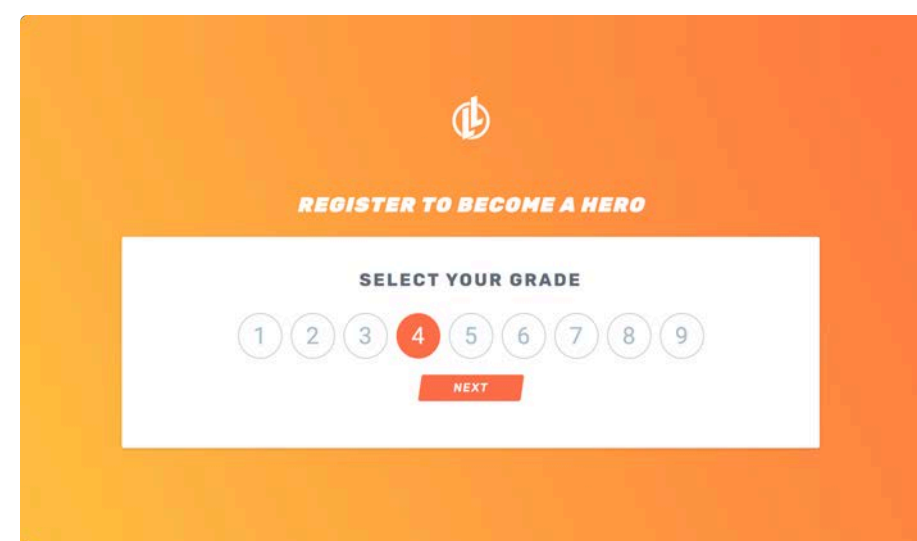

Have your child sign up to play Awakening for FREE at <http://login.legendsoflearning.com>

2

Select state & grade

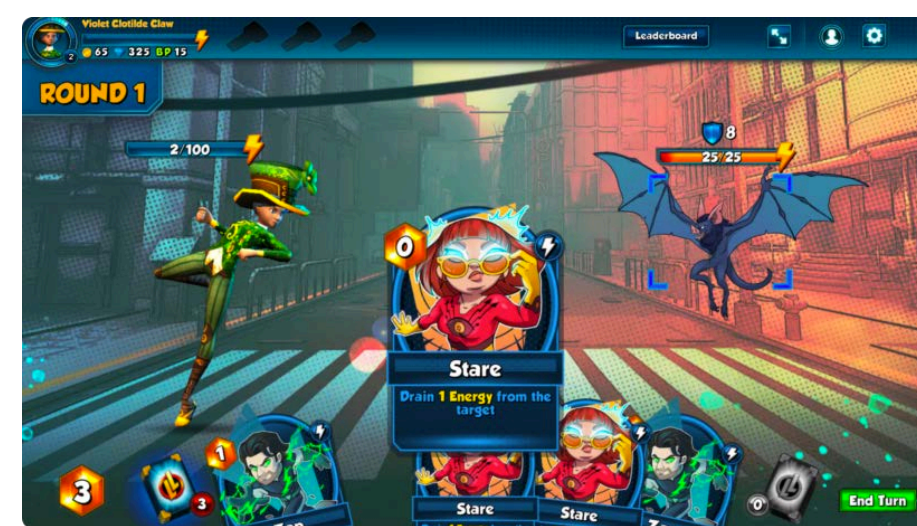

Make sure they select their correct state and grade, so we can make sure the games they're about to play are properly aligned to their school's curriculum.

3

Start playing!

Now your child can start playing! They'll be able to access thousands of instructional science and math games. They'll create and customize an avatar, engage in exciting battles and adventures, and answer grade appropriate questions to win battle bonuses!

4

Monitor progress

As a parent, you'll be able to see your child's progression throughout the game.
