

Dear Parents,

With the shortened school year and potential for summer learning loss, I know you'll need tools to keep your child learning at home. It's a stressful time and difficult to know which learning tools to use.

So, I wanted to introduce you to a tool that will help alleviate some of that stress: Legends of Learning – a game-based learning tool that your child already plays in my classroom during the school year.

Legends of Learning keeps your child engaged by offering thousands of curriculum-aligned math and science games for elementary and middle school students. Millions of students already play Legends of Learning games nationwide in schools, but this summer they can also play at home for FREE with summer activities built around our school's curriculum.

They also have a series of exciting free STEM-related competitions your child can participate in.

Backed by published research out of Vanderbilt University, Legends is one of the only online educational tools that allows you to see your child's learning progression as they play through at their own pace.

The best part? You don't have to stand over their shoulder to make sure they are learning.

Instructions on getting started are below. If you have any questions about the program, please contact support@legendsoflearning.com.

Have a healthy and happy summer.

Sincerely,

Your Child's Teacher

LEGENDS OF LEARNING

SUMMER LEARNING

Free Summer Learning Lessons

Thousands of curriculum-aligned math and science games for elementary and middle school students along with epic quests and battles. Millions of students play Legends of Learning games in school and they can also play at home to progress through the school's curriculum on their own. Backed by published research out of Vanderbilt University, Legends of Learning is a great way to keep your child engaged and learning this summer.

Getting started is super easy!

1

Explore options

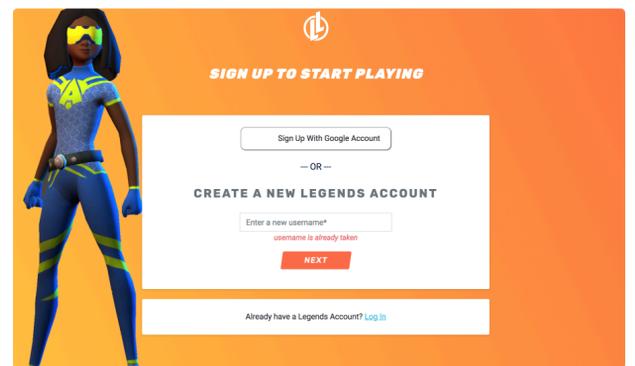

Go to www.legendsoflearning.com/summer to explore the weekly summer learning activities.

2

Sign up

Select a standard and grade level. Create a new FREE account with just a simple username and password, or log in to an existing Legends of Learning account.

3

Start playing!

Now your child can start playing! New users have a brief introductory experience before starting their lessons. They'll be able to access thousands of science and math games. They'll create and customize an avatar, engage in exciting battles and adventures, and answer questions to win battle bonuses!

4

Monitor progress

Have your child complete the weekly lessons and/or explore on their own. You'll be able to see your child's progression throughout the game.
