

A little summer practice can go a long way!

Here's an optional resource families can use at home over break.

Dear Families, I'm sharing this as an optional way to help students keep math and science skills fresh over the break. Students can keep practicing with the **same account they already use at school**, nothing new to set up.

Good to know

- Completely optional, only if it works for your family
- About 15–20 minutes when it fits your routine
- Same school account, no new download
- Many students enjoy it because it feels more like play than homework

Three simple steps

- 1 **Use the school login**
Use the link below or scan the QR code.
- 2 **Pick up where they left off**
Work from class is already saved.
- 3 **Practice when it works for you**
Even a short session helps, no schedule needed.

A little practice now and then can help skills stay fresh over summer.

Getting started is simple

Same login from school. No download needed.
